**COMMENTS**

This was a really good overview of the value of mobile apps versus mobile websites. Observations on the mobile apps offered by database vendors were helpful, as was the overview on what NJ libraries are doing with mobile apps/websites.

The examples/links of mobile apps were useful and something that we can incorporate on our website.

Speakers were terrific. Brisk pace with deep content. Well practiced with detailed visuals to supplement talk. Really impressed by their prep and depth of knowledge. I left inspired to follow up on the topic and implement when I got back to work.

Very well done. Hope the presentation is available online as I could not take notes fast enough.

I learned quite a lot in this session. It was great to get some new ideas of apps to download and I really appreciated the in-depth study on vendor-specific mobile apps.

Good presentation with excellent information. Would have benefitted from a little more "this worked/this didn't" based on the actual experience with Apps at member libraries.

A few factual errors but all in all informative.

I learned a lot in this session. I'm looking forward to following up on my notes! All three presenters were terrific and very knowledgeable and I liked how they presented it in a down-to-earth way with lots of research to back it all up. Great job!

Interesting and relevant.
