5. A subject-specific database might best be described as...
   a. A database that contains articles on only one topic
   b. A database that provides overviews of specific subjects
   c. A database that you can access if you're majoring in a certain subject
   d. A database of publications that relate to a specific academic area or discipline

Honors Program Basic Research Skills Quiz

This quiz will test your knowledge on "Back to Basics, Looking Forward" video tutorial.

Your Name * First Last

Berkeley College Email Address *

Please identify which Honors section you participate in *
- New York-Midtown
- Online
- White Plains
- Woodbridge
- Woodland Park

Complete the following multiple choice questions. Note that only your first attempt for this quiz will receive a grade, so be careful to double check your answers before submitting.

1. Which of these should you not expect to find through a library database? *
- Journal articles
- Books
- E-books
- Newspaper articles

2. What is the best reason for putting quotes around certain keywords when searching in library resources (for example "juvenile delinquent")? *
- To make sure the database searches for all the words
- To make your search results more specific
- To search for two or more words together as a phrase
- To emphasize that keyword's importance in the search

3. If you are searching for New York state laws relating to medical marijuana use and sale, what is the best combination of keywords to use? *
- "medical marijuana" AND laws AND New York
- "medical marijuana" AND legalization AND "New York"
- Laws relating to medical marijuana in NY
- medical marijuana AND New York

4. Why is it important to select "full text" before searching certain databases? *
- To give you access to textbook chapters
- To ensure you have access to complete articles
- To search for exclusive journal articles
- To allow the database to text articles to you

5. A subject-specific database might best be described as... *
- A database that you can access if you're majoring in a certain subject
- A database that provides overviews of specific subjects
- A database that contains articles on only one topic

Differentiated Instruction

iPadagogy Wheel

Originally discovered on the website of Paul Hopkin's education consultancy site mmiweb.org.uk adopted by Allan Carrington at the University of Adelaide and further modified for teachers at Zeeland Public Schools.
