

CABI Publishing Resources now available through VALE Consortium

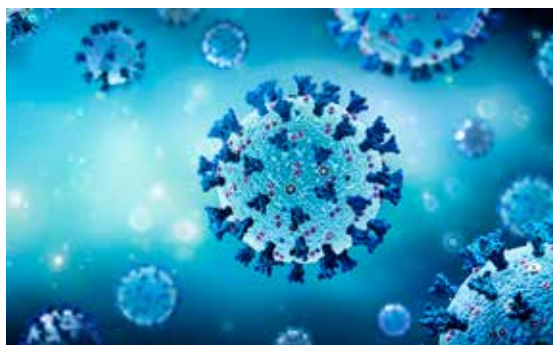

CABI is an international, inter-governmental, not-for-profit organization that improves people's lives worldwide by providing information and applying scientific expertise to solve problems in agriculture and the environment.

With over 100 years of scientific expertise, we understand the critical role libraries play in providing access to high-quality, relevant research. That's why we're proud to partner with **VALE Consortium** to offer a range of CABI's leading publications and databases – spanning **human health, animal and veterinary science, and leisure tourism** – to support teaching, research, and practice across your institution.

CAB Abstracts

CAB Abstracts is the leading specialist database offering instant access to over **12 million** research records spanning agriculture and plant sciences, animal and veterinary sciences, environmental science, soil and forestry, nutrition, and even leisure and tourism

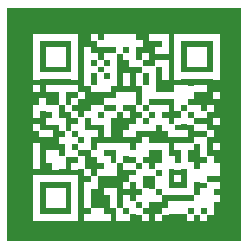

Global Health

Global Health is an essential resource within libraries, classrooms and professional settings, offering reliable, evidence-based information across community and public health. With access to over **4 million** expertly curated research articles, it stands as one of the most trusted databases for global public health research

Nutrition & Food Science Collection

CABI's Nutrition and Food Science Collection is a database of full text, abstracts and research summaries covering human nutrition, food science and technology, as well as education around nutrition and food economics. It provides a comprehensive view of food science and nutrition; from the safe production of food, to food policy and marketing, and the interactions between diet and health

Leisure Tourism Collection

CABI's Leisure Tourism Collection is a database of full text records, book chapters, news, bibliographic information and abstracts for all aspects of leisure and tourism. The collection covers tourism policy and planning, education and training, travel, sports, hospitality, the arts and entertainment, sustainability, recreational activities and cultural heritage

VetMed Resource

CABI's VetMed Resource is the most comprehensive database of veterinary science research available covering all aspects of veterinary medicine and animal health; its contents covers the wide range of animals seen by veterinary professionals. VetMed Resource is suited to the information needs of those based in academic institutions as well as those in practice and industry

CABI eBooks

CABI eBook Collections are available as expertly curated subject sets or can be tailored to meet your library's specific needs. Covering a wide range of disciplines—including agriculture, international development, animal and veterinary sciences, environmental science, plant science, horticulture, forestry, human health and nutrition, and leisure and tourism—our eBooks provide reliable, high-quality content to support research, teaching, and learning
